

6 FILLER TRENDS

What to ask your aesthetic doctor

by Dr **Vittorio Crobeddu**

It's called LIQUID LIFTING or **NON-SURGICAL 3D LIFTING** and it's an aesthetic trend that has been establishing itself in recent months overseas and which will be increasingly popular in the near future. It allows you to model facial features using fillers, giving harmony, volume and rejuvenation, without resorting to a scalpel.

"For this procedure, it is necessary to perform the injections in precise sites and to use fillers that are soft and malleable" clarifies **Vittorio Crobeddu**, dermatologist Isplad and aesthetic doctor. «Among these, is the new **BIOHYALUX FILLER**.

It ensures a great handling and a natural result and causes no swelling after treatment. This is thanks to the structure and purity of the hyaluronic acid used, which is available

Less volume and more shape. The trend for lips is to highlight the natural structure, emphasizing the contours and
